

Preschool Special Education Services

If as a parent, you are concerned about your preschool child's developmental milestones (speech, gross / fine motor skills, behaviors, hearing, etc.) there are several avenues to follow:

1. For students birth to three (3) years of age, contact the county offices for the county in which you live and ask for early intervention services. They will work with you to assess your child's potential needs and will help you to set up the appropriate services.
2. For students three (3) to five (5) years of age contact the director of Pupil Personnel at Naples Central School (374-7910) to begin a preschool referral. The director will help with the referral process and help steer you in the right direction.

The more we can help our students prior to entering school, the more we can insure that the transition to Kindergarten is as smooth as possible. We need to all work together to make it happen.
